

Report on CAIMS • SCMAI 2002 by S.A. Campbell

The 2002 CAIMS • SCMAI Annual Meeting was a very successful event.

Participants enjoyed talks by the excellent plenary speakers including Nira Dyn (Tel Aviv) speaking on *Subdivision schemes in geometric modelling*, Ann Gargett (Old Dominion University) speaking on *Vertical mixing in the ocean: cause and effects*, Jerrold Marsden (Caltech) speaking on *Variational Integrators*, Hilary Ockendon (University of Oxford) speaking on *Mathematics in the textile industry*, and Gordon Swaters (University of Alberta) speaking on *Dynamics of abyssal ocean currents*.

There was a diverse array of specialized sessions including Computational Finance organized by Ali Lari-Lavassani, Hamiltonian Systems organized by Larry-Bates, Environmental Mathematics organized by Paul Sullivan and Philip Chatwin, Fluid Dynamics organized by Sam Shen and T. Bryant Moodie, Mathematical Aspects of Graphics and Visualization organized by Len Bos, and Modelling organized by Rex Westbrook. In addition, about 15 students and postdocs participated in the Poster Session.

Thanks go to local organizers Paul Binding and Tony Ware of the Department Mathematics and Statistics at the University of Calgary for a job well done.

Photos from the meeting can be found below and in the following pages.
